EDUCATION

Bachelor's Degree in Computer Science, Maaref University

09/2021 – 07/2025
Beirut, Lebanon

EXPERIENCE

Full Stack Developer, Forex Flow Community

03/2024 – 06/2025
Beirut, Lebanon

- Collaborated on a forex education and signal tracking platform using **Vue.js** and **Laravel** for real-time pip tracking and community features
- Developed and maintained core modules for daily signal distribution, pip analytics, and user management, improving trader engagement and retention
- Applied best practices in **Laravel architecture** and **Vue.js state management** under senior developer mentorship, strengthening code quality, scalability, and performance

Flutter Developer, Insurance Platform

05/2025 – 08/2025
Beirut, Lebanon

- Built a **Flutter** insurance app using **GetX** for efficient state management, supporting multiple policy types, real-time premium calculations, and secure document submission
- Integrated **API authentication** and digital verification, reducing issuance time by **60%**
- Delivered a **multi-language**, compliant platform with **broker management**, dynamic pricing, and tiered insurance packages

Frontend Developer Intern, Smart Tech Company

05/2024 – 08/2024
Beirut, Lebanon

- Developed a fully functional **eCommerce** web application using **React.js** as part of internal training, implementing responsive UI and modular components
- Contributed to the company's proprietary **ERP system**, delivering new features and UI enhancements with a focus on usability and performance
- Applied modern design patterns using **React with TypeScript**, improving code scalability, maintainability, and developer experience

Programming Tutor

2024 – 2025
London, England

- Conducted 1:1 tutoring sessions in **Scala**, **Python**, and **JavaScript**, tailoring lessons to individual learning goals and technical levels
- Mentored students through hands-on projects using **Django**, **Next.js**, and **Supabase**, emphasizing real-world application and clean architecture
- Taught core computer science subjects such as **OS** and **AI**, simplifying several complex concepts

Web Developer, HH Team Academy

04/2023 – 06/2023
Beirut, Lebanon

- Migrated legacy PHP website to **Laravel (backend)** and **React.js (frontend)** for a modern tech stack
- Built and integrated **RESTful APIs** to enable seamless communication between the frontend and backend layers
- Optimized website performance by improving **load times**, enhancing **UI responsiveness**, and applying modern frontend best practices

PROJECTS

MU-Hub, Laravel, React Js, MongoDB, Chakra UI

02/2025 – 06/2025

- Developed a full-stack student networking platform as my senior project
- Addressed common university life challenges, especially for freshmen
- Used **Laravel + MongoDB** backend with **React.js + Chakra UI** frontend

MU-Blog, Laravel, React Js, Tailwind CSS

01/2025 – 02/2025

- Built a student community website for Maaref University using **Laravel**, **React**, and **Tailwind CSS**
- Achieved an **A+** grade as a standout project for the web development course
- Completed the project efficiently with a partner using a **feature-by-feature** development approach
